

The Inspire Project

Who They Are:

Tanya Leah, Ilene Angel & Lorraine Ferro

Where They Are: New York, NY

Sound Like: Female Crosby, Stills & Nash

For Fans of: Great songs, three-part harmony with three distinct lead singers, deep lyrics, and profound joy.

Why You Should Pay Attention:

These three hit songwriters have collaborated on each other's projects throughout their long friendship, but now after years of successful separate careers, they "accidentally" came together as a band for a friend's cancer fundraiser at the Folk Project in Morristown, New Jersey. Their premier performance was "Positively electric!" and it was clear to everyone present that musical magic was happening. They were offered another date before they even left the stage.

Since then, their authentic brand of original music, fun, and friendship have made them crowd favorites at venues like New York's Arlene's Grocery and The Rockwood Music Hall, and as headliners at the Folk Project and the "Music at the Mansion" concert series in NJ.

With the release of their new 6 song EP, The Inspire Project is living up to their mission, "Making the world a better place...one song at a time."
